Erasmus+ Programme
of the European Union

Today, I want to introduce you to a problem
that some schools have found.
It is about bullying against teachers.
I'm going to tell you a story of bullying
against a poor teacher.

The story took place in our school,
ITIS GALILEO GALILEI.
It contains about 1500 students

One day a class of the ITIS Galileo Galilei school found himself without teacher for family reasons. Afterwards, the school called a new teacher who will accompany them for the end of the school year.

However, from the first moment, he seems inexperienced and very shy.
Seeing all this, 3 students in the class started making fun oh him, causing him also a lot of spites

The matter went on for a week until the teacher decides to talk about that with the principal manager. At first he would like to report the attack at the police but then principal told him:
"Violence is not the cure for the violence"

So he decides to ask his other 16 students for help so that he can make the bullies understand that what they are doing is wrong.

The students decided to do the same thing that the 3 students were doing against the teacher, but now directed at them, as to make them understand what it feels like to be bullied.
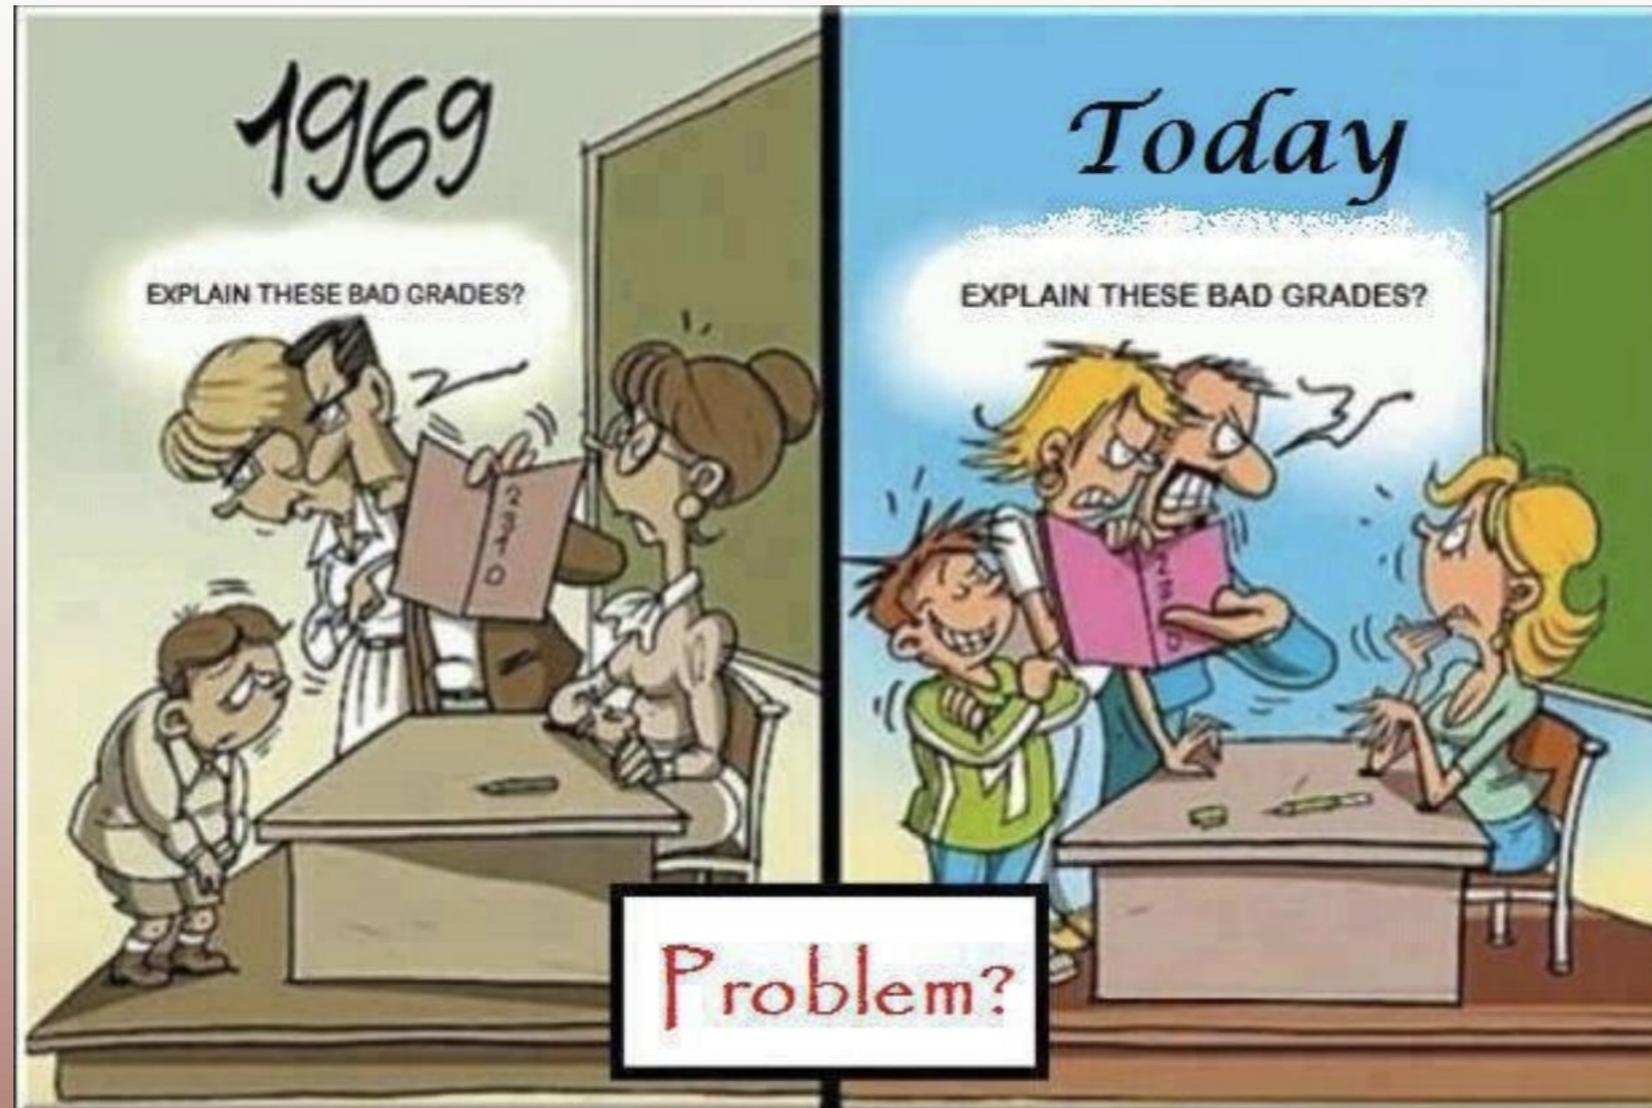

The next day the 3 students were ignored from everyone and every time they tried to talk they were silenced by the partner near him.

In the end the teacher ignorant of the student's plan, decides to intervene by saying to stop it immediately as the 3 student seemed quite aware of the mistake that they made. The 3 bullies apologized immediately and they said they would never do such a thing again.

I want to finish by saying one last thing

Sometimes bullying towards teacher is committed by the parents and I think that this image can make people understand how the attitude towards teachers has changed.

THANKS FOR WATCHING
