

P8 The 4Rs

ERASMUS

Responsible students, responsible citizens

Lycée Mme De Stael, St Julien en Genevois

Reducing

Reusing

Recycling

Repairing/ Repurposing

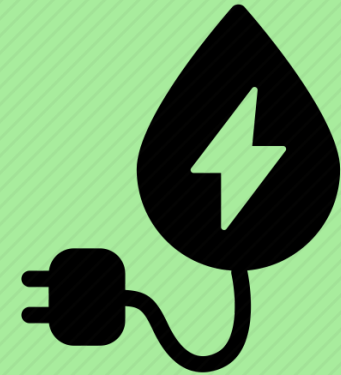

French laws

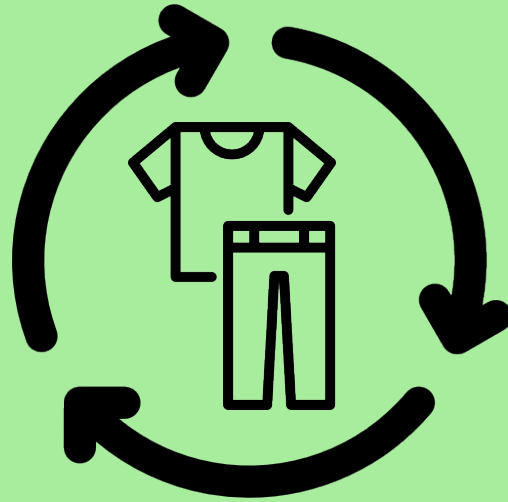

Reducing

= using less material and energy to minimize waste generation and preserve natural resources.

Reusing

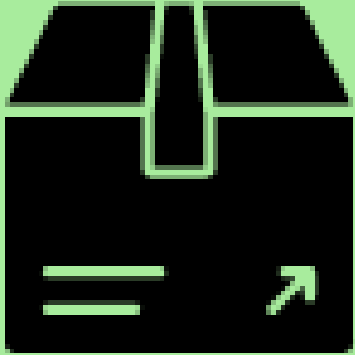

= using the same products or components again for the purpose for which they were conceived.

for instance : clothes or jam pot

Recycling

It is a process that turns used materials (waste) into new, useful products.

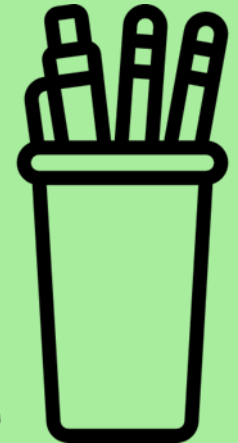

Repairing/ Repurposing

To repurpose a material is to reuse the (waste) material in its original state, but to a different purpose.

For exemple: a jam pot turned into a pencil pot

French law

LES PRINCIPAUX OBJECTIFS DE LA LOI DE TRANSITION ÉNERGÉTIQUE

-40% d'émissions
de gaz à effet de serre
en 2030 par rapport
à 1990

-30% de consommation
d'énergies fossiles
en 2030 par rapport
à 2012

Porter la part des énergies
renouvelables à **32%** de
la consommation finale
d'énergie en 2030 et à **40%**
de la production d'électricité

Réduire la consommation
énergétique finale
de **50% en 2050**
par rapport à 2012

-50% de déchets
mis en décharge
à l'horizon 2025

Diversifier la production
d'électricité et baisser
à **50%** la part du nucléaire
à l'horizon 2025

From awareness to action

We KNOW waste management is an issue.

We KNOW all about

Reducing,
Recycling,
Re-using,
Repairing.

What we need is to be more intent on acting,
As students and as citizens, in and outside school.
